

## Is your current cleaner dirty?

Cleaning is supposed to remove dirt and harmful substances. But the chemicals in many cleaning products emit Volatile Organic Compounds (VOCs), which are hazardous to your health.

It's something to think about when you spend so much time indoors, because concentrations of VOCs there can be up to 10 times higher than outdoors.\*

The Environmental Protection Agency has warned that indoor air quality is the number one environmental health problem in the U.S.

## We believe good questions lead to better solutions.

Why use a cleaner that contains toxic chemicals? First it exposes you to VOCs when you apply it to the carpet. Then, because it's toxic, you have to clean the cleaner out of the carpet. That just means more exposure to VOCs—and extra work.

Evolut-ion products clean in fewer steps and contain no harmful ingredients. Now you have two reasons to breathe easier.

# Evolut-ion™

Non-toxic solutions for  
the hospitality industry

## Why we made a cleaner cleanser.

We know how hard you work. We began as a professional carpet cleaning company 15 years ago in Monaco. Working for prestigious hotels and casinos on the French Riviera, we learned all about providing outstanding service. We also learned the industry's dirty little secret: it takes a complicated assortment of toxic products to keep carpets clean.

We wanted a simpler and safer way to work. No matter where we looked, though, we couldn't find products without harmful ingredients that could clean to professional standards. It was an industry-wide problem.

So we took on the challenge to create a better solution. Working with an experienced chemist, our first priority was to deliver exceptional cleaning performance. We also wanted to feel safe using the products day after day in our jobs and in our homes, because Orbeco was and still is a family-owned business.

The result is Evolut-ion—four simple, effective, non-toxic products that can make your job easier and provide a clean, fresh, comfortable environment for guests.

## While you care for the carpets, who's caring about you?

Cleaning carpets is hard work. Most carpet cleaner manufacturers think they're helping you by creating stronger, more toxic cleaners.

We think that sounds dangerous. So we took a completely different approach. Our patented technology removes dirt and stains by *ionization* instead of harmful substances. It cleans as well as conventional cleaners, it gets the job done with fewer products, and it's safe.

Some call it "green." We call it Evolut-ion.

## How much can you save?

Some of the biggest names in the hospitality industry have announced green initiatives. It's not a fad, it's a way to save:

- **Save your health.** Removing harmful ingredients from products helps keep them out of your body.
- **Save time.** Sweat less, do more with a simpler line of products that help you work faster.
- **Save money.** Making carpets look better longer makes you look good, too.
- **Save the environment.** Make things better for future generations.

## Simpler is smarter.

Evolut-ion provides full, effective carpet care with just 4 products:

### Easy as 1-2-3, without step 2 or 3.

Use **Evolut-ion Carpet Cleaner** for injection/extraction and you can do the job in one step instead of two or three. With no sticky residue, there's no defoamer or rinse solution required. You get beautifully restored carpet—even in high-traffic areas—in just one step.

### Smoke never checks out.

Carpets trap and hold tobacco smells and bad odors even after you've cleaned. Concentrated **Evolut-ion TAB Odor Neutralizer** absorbs and destroys smells. Add a small amount to your extraction process and you'll leave a fresh, clean scent instead of that damp, musty odor. Or simply spray the air between cleanings.

### Real clean, real fast.

Now you don't have to choose between deep cleaning and fast drying. **Evolut-ion Cleaning Solution** works with your low-moisture system—but it doesn't just hide the dirt, it removes it. And because it's low-moisture, the carpet dries in under 10 minutes.

### Your knees will thank you.

What's worse: getting down on your knees to scrub a stain, or knowing the stain will come back even after all that effort? **Evolut-ion All-Purpose Spotter** removes stains permanently. It quickly absorbs pet stains, wine, coffee, ink, cosmetics, food, and more. So you can spray, wipe, and be back on your feet in no time.

## Our products pass the test — again and again.

All Evolut-ion products are approved in line with WoolSafe Organization's stringent test procedures and are safe to use on wool and wool-rich carpets.
